^• Represents tons of primary products of the industry shipped per man-hour worked by production, development, and exploration workers: For mines only represents primarily tons of crude ore shipped per man-hour, for mines with treatment plants represents primarily tons of treated ore shipped per man-hour.

Includes figures for separately reported central offices and related facilities. These were not distributed by type of operation.

Represents establishments with no production, development, or exploration worker man-hours, with man-hours spent on exploration or development work amounting to 30 percent or more of total man-hours of production, development, and exploration workers, with cost of contract work amounting to 30 percent or more of production, development, and exploration worker wages, with number of working proprietors amounting to 30 percent or more of number of production, development, and exploration workers and, for silver ores, number and payroll of employees at separately reported central offices and related facilities.
